PROFILE

I am a 12th-grade senior at Hillcrest High School with a strong interest in creativity, technology, and problem-solving. I grew up in Bangladesh and now live in Queens, New York. Moving between two countries and school systems taught me to adapt quickly, learn independently, and stay open to new people and ideas.

I started graphic design and video editing when I was young. Over time, I added cinematography, photography, Photoshop, VFX, color grading, Blender, websites, apps, games, social media work, leadership, and community service. I learn best by making real things and improving them.
